## 52 Buick

**Hook:** 12-8 Nymph

**Thread:** 6/0 black thread

**Tail:** Olive guinea fowl or mallard flank

**Body:** Various shades of green seal fur

**Rib:** Medium oval silver or gold tinsel

**Beard:** Olive guinea fowl or mallard flank

**Head:** Peacock herl

### Tying Instructions:

- Tie in tips of guinea for tail, and trim off the butt ends. Tail should be at least half the length of shank.
- Tie in oval tinsel.
- Dub seal fur on to your thread and wrap the dubbing towards eye of hook, leaving enough room for the head of the fly.
- Wrap your oval ribbing over the seal fur and trim.
- Tie in another set of guinea fowl tips for the beard. Guinea tips should extend to the hook point.
- Last step is to tie in a strand of peacock herl, make 2 or 3 wraps, tie off, trim, and whip finish.

### Giant Damsel

**Hook:** TMC 300, Mustad 79580, sizes 6-10  
**Thread:** 6/0 Olive  
**Tail:** Dyed olive grizzly hackle  
**Body:** Olive and black variegated wool yarn  
**Legs:** Dyed olive grizzly hackle  
**Wing:** Dyed olive grizzly hackle  
**Head:** Light olive chenille

### Tying Instructions:

- Tie in grizzly marabou at bend of hook for tail. Tail should be about half the length of the body.
- Dub wool yarn on to thread and wrap forward leaving enough room for the chenille head.
- Tie in more grizzly hackle out the top and bottom, both the wing and the legs should be about the same length as tail.
- Tie in olive chenille and make 1 or 2 wraps to form head, and then secure with thread.
- Trim, whip finish, and head cement.

### Larva Lace Damsel

**Hook:** 8 Nymph  
**Thread:** 8/0 Olive  
**Tail:** 3 Goose biots  
**Body:** Green larva lace  
**Wingcase:** Light green pheasant tail  
**Thorax:** Peacock herl  
**Legs:** Light green pheasant tail.

### Tying Instructions:

- Tie in 3 goose biots for tail. To represent the 3 distinct gills on a damsel fly nymph. 1 Goose biot to each side, and one out the middle.
- Tie in larva lace with but extending down the shank, so that you don't have a thicker abdomen than thorax.
- Wrap larva lace forward 7 times.
- Tie in pheasant tail with tips extending over body.
- Tie in 2 strands of peacock herl and wrap forward to just before eye.
- Tie in pheasant tail tips or legs on both sides of the thorax.
- Pull pheasant tail forward over thorax and tie in with thread.
- Whip finish, and head cement.

### Larva Lace Marabou Damsel

**Hook:** 8 Nymph  
**Thread:** 8/0 Olive  
**Tail:** Light Green Marabou  
**Body:** Green Larva Lace  
**Wingcase:** Dyed light olive pheasant tail  
**Thorax:** Woolly bugger marabou wrapped  
**Eyes:** Black small plastic

### Tying Instructions:

- Secure plastic eyes on hook, just before the eye of the hook by making several figure eight's with your tying thread.
- Wrap thread back to bend of hook and tie in marabou fibers for tail.
- Tie in larva lace for body, let but lay along the entire length of body, so that the beginning of body is not thicker than the rest.
- Wrap larva lace forward seven times to imitate the 7 distinct segments on a damsel fly.
- Tie in pheasant tail for wingcase, with tips extending back over body.
- Tie in Woolly bugger marabou and wrap forward to the plastic eyes.
- Pull pheasant tail forward over thorax and secure with thread.
- Whip finish and head cement.

### Marabou Damsel

**Hook:** 10-8 Nymph  
**Thread:** 6/0 Black  
**Tail:** Olive Marabou  
**Body:** Olive Marabou wrapped  
**Rib:** Fine gold wire  
**Legs:** Died olive pheasant tail  
**Wingcase:** Died olive pheasant tail  
**Thorax:** Olive Marabou Wrapped  
**Eyes:** Black plastic  
**Note:** Can be tied in many shades of tan, olive, and brown.

### Tying Instructions:

- Wrap thread forward to eye of hook, and tie in black plastic eyes. This is done by criss crossing back and forth over the middle of the eyes, in a figure eight motion until the eyes are locked in place.
- Tie in marabou at hook bend for tail. Don't trim the butts, they will be used to form body.
- Tie in fine gold ribbing.
- Wrap marabou forward, 3/4 the way up the hook shank, and tie off with thread, but still do not trim butts.
- Wrap ribbing over the body and secure with thread, and trim.
- Tie in olive pheasant with tips facing back over the body.
- Tie in a clump of pheasant on either side for legs.
- Make a few more wraps with marabou until you reach the eyes. By now the marabou should be getting more bushy and should create a thorax slightly thicker than the body.
- Pull pheasant laying over body forward for wingcase.
- Tie in with thread, whip finish, and head cement.

### Seal Fur Damsel

**Hook:** 12-6 Nymph  
**Thread:** 8/0 Olive  
**Tail:** Speckled pheasant tail  
**Body:** Olive Seal fur  
**Ribbing:** Medium silver wire  
**Wingcase:** Speckled pheasant tail  
**Legs:** Speckled pheasant tail

### Tying Instructions:

- Tie in pheasant at bend of hook for tail.
- Tie in silver wire.
- Spin seal fur on to thread and wrap forward 3/5 up the hook shank.
- Wrap wire over seal fur 3 or 4 times and secure with thread and trim.
- Tie in pheasant tail with tips extending back over body.
- Dub more olive seal fur on to thread and wrap forward to just before eye.
- Tie in pheasant tail out bottom for legs.
- Pull pheasant tail over thorax to form wingcase. Secure with thread and trim.
- Whip finish and head cement.

### Segmented Damsel

**Hook:** 10 or 12 Nymph  
**Thread:** 8/0 Olive  
**Tail:** Olive marabou  
**Tail Ribbing :** 2lb Mono filament  
**Body:** Olive marabou wrapped  
**Rib:** Gold wire  
**Wingcase:** Olive pheasant tail.  
**Thorax:** Woolly buggie marabou wrapped  
**Legs:** Olive pheasant tail

### Tying Instructions:

- Tie in marabou at bend of hook for tail. Tail should be about 1 and a half time the length of the body.
- Tie 2lb test mono filament in knots around the marabou tail in 3 equal segments.
- Tie in gold wire for ribbing.
- Tie in marabou for body and wrap forward half way up hook shank.
- Tie in pheasant tail with tips extending back over body.
- Tie in woolly buggie marabou and wrap forward to just before eye of hook.
- Tie in several pheasant tail tips on either side of thorax for legs.
- Pull pheasant tail forward for wingcase and secure with thread.
- Trim, Whip finish, and head cement knot, wingcase, and the 3 mono filament knots on the tail.
