Golden Stone

Hook: #6-14 Tiemco 200R

Thread: 6/0 Tan

Tail: Golden Goose Biots

Body: Dubbing

Rib: V-Rib

Wingcase: Turkey Quill Fibers

Antennae: Golden Goose Biots

Tying Instructions:

- Start by tying in the goose biots for the tail. Length should be about half the shank.
- Tie in ribbing material then dub a thick but tapered body halfway up the hook.
- Tie in the first wingcase, second and third wingcase but in between them make a wrap or 2 of dubbing. Rib the fly.
- Tie in the antennae and whip finish.

Kaufman's Stone (Black)

Hook: TMC 300, Weighted

Tail: 2 Black Goose Biots

Body: Black dubbing

Rib: Black Swannundaze

Wingcase: Three separated sections of lacquered dark turkey tail, clipped to shape.

Thorax: Same as body

Head: Same as body

Antennae: Two black goose biots.

Tying Instructions:

- Cross 2 black goose biots to form an X and tie in where the 2 biots meet.
- Wrap thread to eye of hook and tie in 2 more goose biots by the same method. Make sure that the line will still be able to pass through the eye of the hook.
- Wrap lead wire along shank from one end of the hook shank to the other, leaving small gaps between the eye and tail of the hook.
- Wrap thread back and forth over lead wire until it is no longer visible. Then wind thread back to tail.
- Tie in black swannundaze.
- Spin black dubbing on to thread and wrap forward to half way up hook shank. Body should have a distinct taper, getting larger towards the middle of the shank.
- Tie in a section of turkey quill, lacquer, and then trim to form a "V tip".
- Wrap dubbing over base of turkey and tie in another turkey quill as in step 7.
- Once again make 2 or 3 wraps of dubbing along base of turkey quill and tie in another turkey quill and trim.
- Spin more black dubbing on to thread and make several wraps to form a head.
- Whip finish and head cement.
